## NEWS RELEASE

# Surge Announces Fully Subscribed Private Placement

**Vancouver, BC – Sept 10, 2019** –Surge Exploration Inc. (“the Company” or “Surge”) (TSXV: SUR, OTC: SURJF, FRA: DJ5C) is pleased to announce a fully subscribed non-brokered private placement with a combination of units (“Units”) and flow-through units. (“FT Units”) of the Company for gross proceeds of \$400,000. Each Unit and FT Unit are at \$0.05.

Each Unit and FT Unit is comprised of one common share of the Company and one share purchase warrant. Each share purchase warrant will entitle the holder thereof to purchase one additional common share of the Company at an exercise price of \$0.05 per share, for a period of two years from closing, subject to TSX Venture Exchange (“Exchange”) approval.

The proceeds from the FT Units will be used to advance the Company’s British Columbia properties. The proceeds from the Units will be used for exploration activities and for general working capital purposes.

Finder’s fees will be paid in connection with the private placement and all finder’s fee payable are subject to Exchange approval.

The closing of the private placement is expected to close on or before September 13, 2019. All securities issued in connection with the private placement are subject to a four month and a day hold period in accordance with applicable Securities Laws.

### About [Surge Exploration Inc.](#)

The Company is a Canadian-based mineral exploration company which has been active in the resource sector in British Columbia and elsewhere in Canada.

### Golden Triangle – Trapper Lake Property (Copper Gold), British Columbia

The Company owns 100% interest in the Golden Triangle – Trapper Lake Group of 23 mineral claims which are located in the prolific Golden Triangle Region of northwestern British Columbia approximately 90 km ENE from Juneau, Alaska. Surges’ staking program totals an area of approximately 325 sq. km within the regionally important geological and structural trend. A large portion of the new property is adjacent to the Thorn Project owned by **Brixton Metal’s Corp. (“Brixton”, TSXV: BBB)** with the balance covering prospective open ground containing numerous B.C. Minfile showings with Cu, Ag, Au values adjoining the boundaries of the Golden Bear Mine, a 480,000 oz Au past producer.

In Brixton's news release dated July 15, 2019 ([Brixton News Release](#)), they reported results from drill hole THN19-150, which was drilled to 829.06 metres depth at the Oban diatreme breccia pipe within the Camp Creek copper corridor. Brixton reported a drill hole intercept of 1.97 grams per tonne gold equivalent across 554.70 meters including 135.96M of 1.35 g/t Au, 0.31 % Cu, 133.62 g/t Ag or 5.00 g/t Aueq including 6M of 3.56% Cu, 3.37 g/t Au, 257.77 g/t Ag. Structural mapping and soil-rock geochemistry at the Chivas zone and relogging of select core from the Glenfiddich zone were also conducted as part of the overall exploration program at the Thorn Project.

### **Mineral Mountain Properties (Copper Gold) British Columbia**

The Company owns a 100% interest in the Omineca Group of 12 claim blocks which are located in the Omineca Mining Division of north-central British Columbia, approximately 150 km north of Fort St. James. The claims are not subject to any royalty terms, back-in rights, payments or any other agreements and encumbrances.

B.C. Minfile assessment report data indicates that most of the area covered by the Omineca Group claim blocks were at one time or another covered by staking during surges of exploration in B.C. dating from the 1940's to present day. Largely the claims appear to have been minimally explored with little follow-up. However, some work was recorded on several claims with results for stream sediment sampling showing anomalous to highly anomalous results for gold in a few areas. These areas were recommended for detailed follow-up, however due to a previous commodity price downturn no further work was recorded.

Prominent among early discoveries in the Omineca region were the nearby Lustdust/Stardust property (**Sun Metals Corp. TSXV: SUNM**) covering a large, coherent integrated porphyry-skarn-manto, epithermal system; the Kwanika property (**Serengeti Resources Inc./POSCO Daewoo TSXV: SIR**) a promising advanced stage copper-gold project; the Lorraine property (**Teck Resources and Sun Metals**) host to a significant copper gold NI 43-101 compliant resource. The Surge tenures are located between the Kemess North project being developed by **Centerra Gold's** subsidiary Aurico Metals and Centerra Gold's operation **Mt Milligan mine**.

### **Hedge Hog Property, (Copper Gold) British Columbia**

The Company has an option to earn an undivided 60% interest seven mineral tenure covering 2,418 hectares (5,972 acres) located approximately 80 km northeast of the town of Quesnel, BC and 20 km north of the historic gold mining towns of Wells and Barkerville.

### **Ontario Cobalt Properties (Cobalt) Ontario**

The Company has an option to earn an undivided 60% interest in the Glencore Bucke Property and the Teledyne Property, located in Cobalt, Ontario Canada.
